The main direction of scientific activities:

- assessment of the reliability of geodetic and land management works;
- deformation processes in technologically overloaded urban areas;
- research of technologically polluted territories.
- creation of a geodynamic landfill;
- geomonitoring of urban areas.

Employment History

Teaching Assistant of the Department of Land Management, Road-Building and Geodesy at Prydniprovsk State Academy of Civil Engineering and Architecture (PSACEA), Dnipro

2007 – 2015

Associate Professor of the Department of Highways, Geodesy and Land Management at Prydniprovsk State Academy of Civil Engineering and Architecture (PSACEA), Dnipro

2015- Present

Education

Faculty of Civil Engineering, Specialty “Mine Surveying”, National Mining University (NMU), Dnipro. I was qualified as Mining Engineer-Surveyor.

2002 – 2007

Postgraduate student at the State Higher Educational Institution “Prydniprovsk State Academy of Civil Engineering and Architecture” (PSACEA), Dnipro

2008 – 2011

Science degree

Received the academic title of Associate Professor, Kyiv

2015

Theme of the thesis: “Evaluation of the geodetic network reliability at geomonitoring of built-up territories”, specialty 05.24.01 – Geodesy, Photogrammetry and Cartography.
