EU Policy on Green Economy and Innovation: Textbook /
edited by Orlovska Yu.V. (Second edition, revised and expanded)

Dnipro: UDUNT, 2025. – 232 p.

ISBN 978-617-8314-72-9

Recommended for publication by the Academic Council of the Ukrainian State University of Science and Technology (Protocol No. 16 of August 20, 2025)

This textbook is intended to provide theoretical and practical skills for developing theories and models of innovative development within the framework of building the EU's green economy, including those related to green economic growth (green growth strategies within the global Green Deal policy) and endogenous territorial development under socio-ecological-economic models. The key theories of the course are presented in the context of the European Green Deal and other modern EU policies aimed at shaping the green transition. The content of the textbook focuses on the formation of theoretical and practical aspects of green growth policy and innovation development based on successful EU country practices, particularly through the use of the case-study method.

For students of higher education institutions, lecturers, researchers, experts, representatives of public authorities and local self-government, civil society organizations, and a wide range of interested readers.
